-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 20, 2006 has been entered.

Claims 1-5 are pending.

Claim Rejections - 35 USC § 103

The outstanding rejection under 35 USC 103(a) is maintained for the reason of record.

Response to Arguments

Applicant's arguments filed April 20, 2006 averring the cited prior art's failure to provide the motivation of incorporating propylene glycol into the mometasone topical cream have been fully considered but they are not persuasive. Examiner notes that the arguments assume that the composition is used in dermatological application (i.e., arguments towards irritation of skin). Such arguments are directed to the intended use of the composition. Arguments directed to intended use is considered moot since the intended use of the composition does not lend patentable weight to claims directed to composition. Furthermore, '105 teaches the composition can be used as topical and for

Art Unit: 1617

nail application. Therefore, even propylene glycol can cause vasoconstriction, it can still be useful in formulating a topical composition for treating nail infection.

Applicant's arguments filed April 20, 2006 with regard to US 4,808,610 have been considered, but are not found persuasive. Firstly, the rejection does not at all based on US 4,808,610, therefore, the arguments directed towards the teachings of US 4,808,610 are considered moot. Secondly, even *arguendo*, '105 cited US 4,808,610 as a reference teaching mometasone cream is well-known. Furthermore, in '105, propylene glycol was not taught to decrease the efficacy of mometasone. In fact, there is nowhere in '105 teaching propylene glycol would decrease the efficacy of mometasone. Actually, propylene glycol was taught to be one of the invention of '105 (See col. 3, lines 33 – 61).
